

**Attention All Firefighters - Emergency Medical Technicians -
Emergency Management Staff - Code Enforcement Staff - Blasters**

With the completion of the integrated database ALL personnel who are certified through the IDHS/ILEA will receive a new Public Safety Identification (PSID) in the coming weeks.

IDHS will mail each certified person a certificate along with a wallet card with their new PSID.

The PSID replaces your state certification. The PSID number is randomly generated. Therefore, you can't request a special PSID or keep your same State certification number. **DO NOT CALL THE OFFICE ASKING FOR YOUR NUMBER.** That delays staff in getting the necessary work done.

Certificates will be mailed out within the next week for all currently certified persons.

We realize this will create some conflict but it is necessary to complete this database upgrade. We appreciate your patience and cooperation in this matter.
